Prenatal Drug Screening

In an effort to provide the best prenatal care we can, we follow a protocol with all newly pregnant patients that includes drug screening with your prenatal labs.

This is to ensure that there are no unexpected reactions with medications we might prescribe, and to help us counsel you if substance use might be an issue.

The results of these tests are a confidential part of your medical record and are only used by our office and the hospital in which you will deliver.

I have read the above statement and agree to the testing.

I have read the above statement and decline to the testing.
